

PREPARED QUESTIONNAIRE

Provider Enrollment Questionnaire

Use this form when adding an individual physician or other licensed practitioner to your facility, group, or provider roster. The completed questionnaire can be keyed into your internal database, credentialing tracker, CAQH workflow, or payer enrollment process.

Intended use: collect a standardized profile before enrollment, credentialing, contracting, privilege review, or payer setup.

Recommended process: have the provider complete the form, attach supporting documents, and route it to your enrollment / credentialing team for validation.

Table of Contents

This questionnaire is organized so the answers can be entered directly into a provider database or enrollment checklist.

1. Instructions & completion standards	2
2. Provider identity & demographic profile	2
3. Licensure, identifiers & certification	4
4. Education, training & work history	5
5. Relationship to facility / practice	6
6. Professional disclosures & compliance	7
7. Required attachments checklist	9
8. Attestation, signature & internal review	10

Instructions & Completion Standards

For the provider: complete every applicable field. If an item does not apply, enter N/A rather than leaving it blank. Use the same legal name, NPI, and license details that appear on your official records.

For the facility / enrollment team: compare the submitted answers against source documents, payer roster requirements, CAQH data, sanction-screening results, and internal privileging records before final approval.

Suggested completion rules

- Collect a copy of every license, DEA registration, board certificate, and malpractice insurance face sheet listed in this packet.
- Document effective dates exactly as shown on source documents.
- Use one questionnaire per individual provider, even when several providers join the same facility.
- Retain the signed questionnaire and supporting documents in your credentialing or provider-master record.
